Marcas registradas por la FEDME

PR-TF 69 Chío-Vera de Erques
Along this path we can observe numerous plots devoted to traditional agriculture, such as vineyards and some isolated houses. A visit to the rural settlement of Chirche is a must as it has been declared a Site of Cultural Interest, as well as the hamlet of Las Fuentes.

SL 201 Chío-Arguayo
Along this path we will see traditional agricultural plots with low dry stone walls, and we will enjoy panoramic views of the western side of the town. In this area of volcanic badlands, the main vegetation consists of aeoniums and isolated pine trees.

PR TF 70.1 Boca Tauce - El Jaral
This route offers spectacular panoramic views of the town, and especially of the Barranco de Tágara ravine. There are different ethnographic elements along the path.

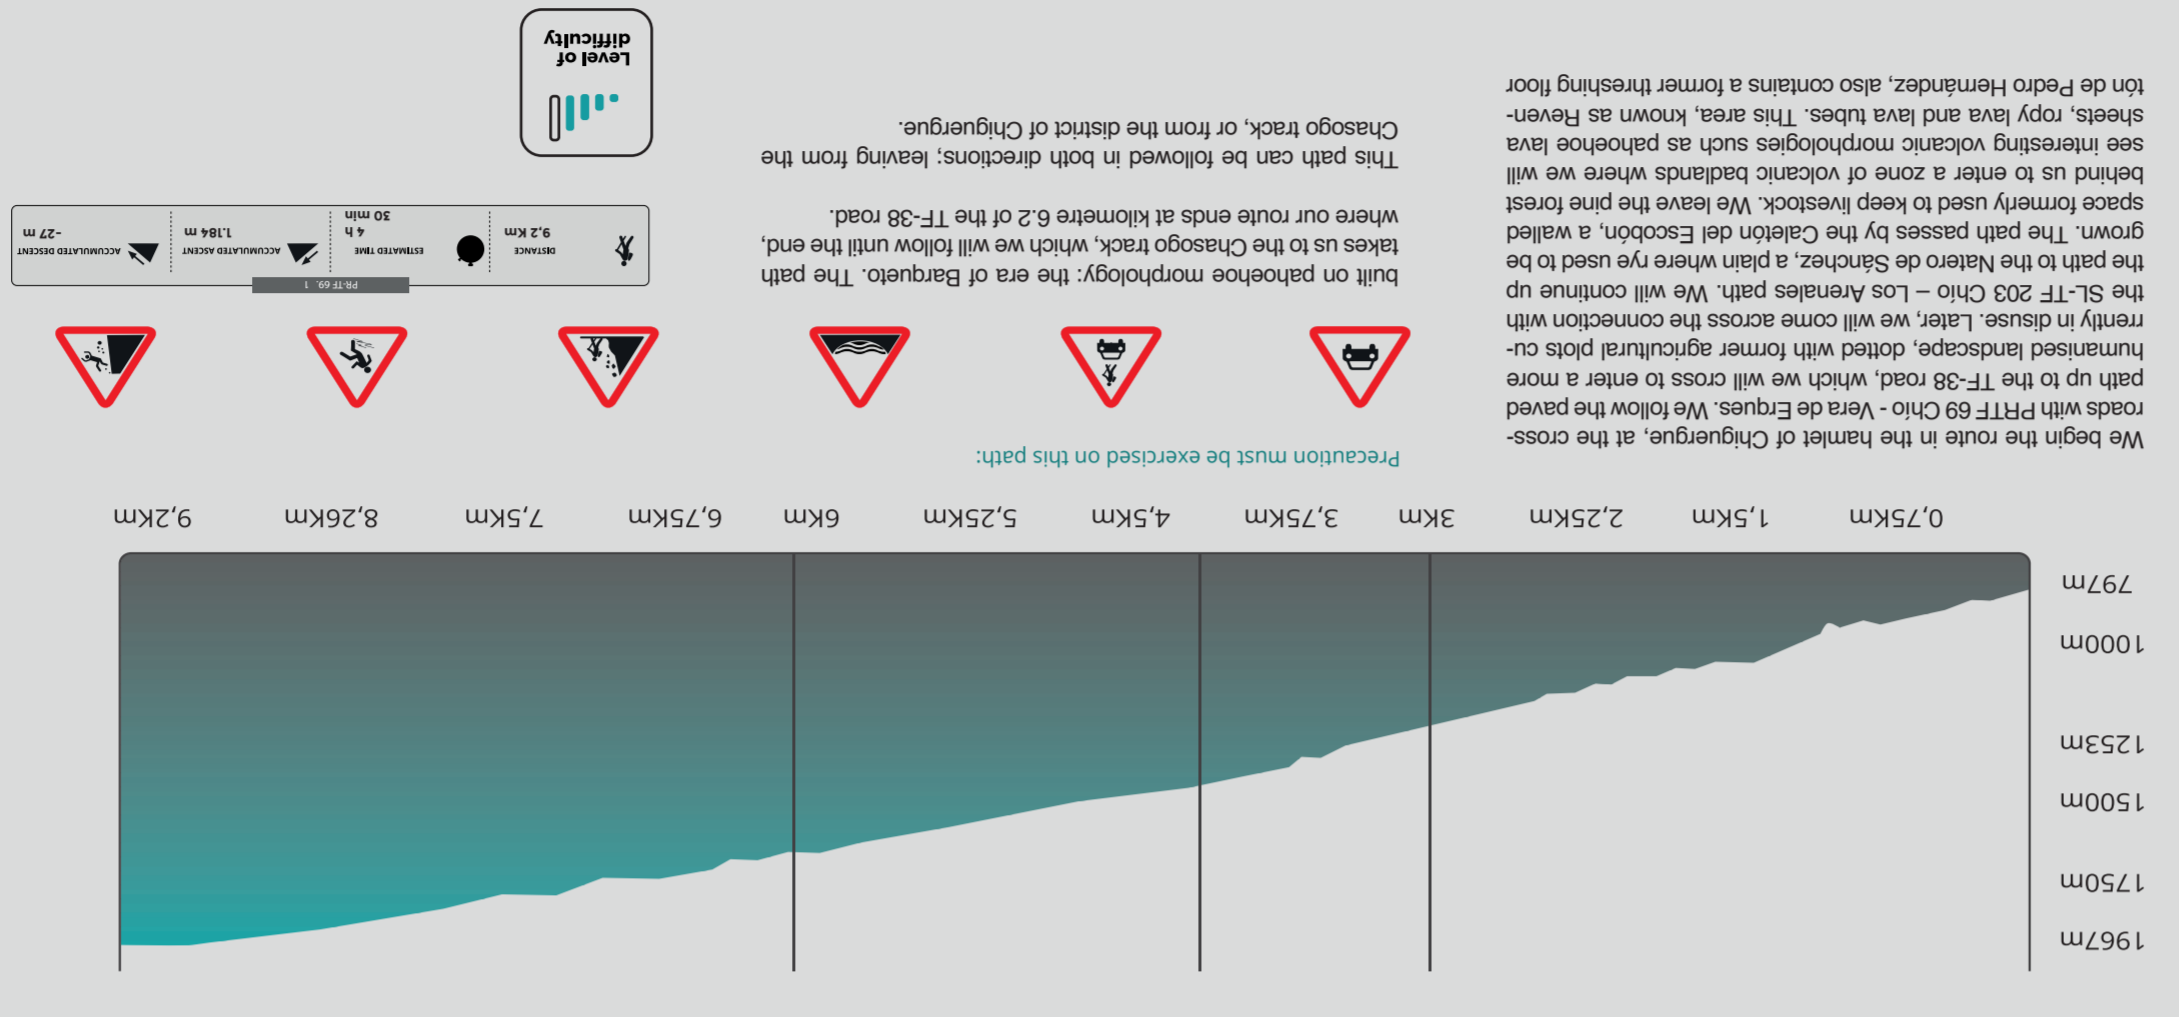

SL 203 Chío-Arenales
The route begins by crossing a pine forest growing on recent basaltic lava flows and passes through a very homogeneous area with small lapilli fields and volcanic badlands. There is a recreational area here and a zone for camping.

PR-TF 70.2 Boca Tauce - Las Fuentes
This route provides impressive panoramic views of the mountains of Isora, and even out as far as the islands of La Gomera, La Palma and El Hierro. We will find endemic species such as tagasaste and sticky broom (codesos), and we will visit the hamlet of Las Fuentes.

SL 206 El Jaral-Guía de Isora
The Barranco de Rodrigo ravine and the Cruces de Ramallo are some of the places of interest that you will find along this path covered in rock roses, shrubs with striking white flowers traditionally used to smoke cheeses.

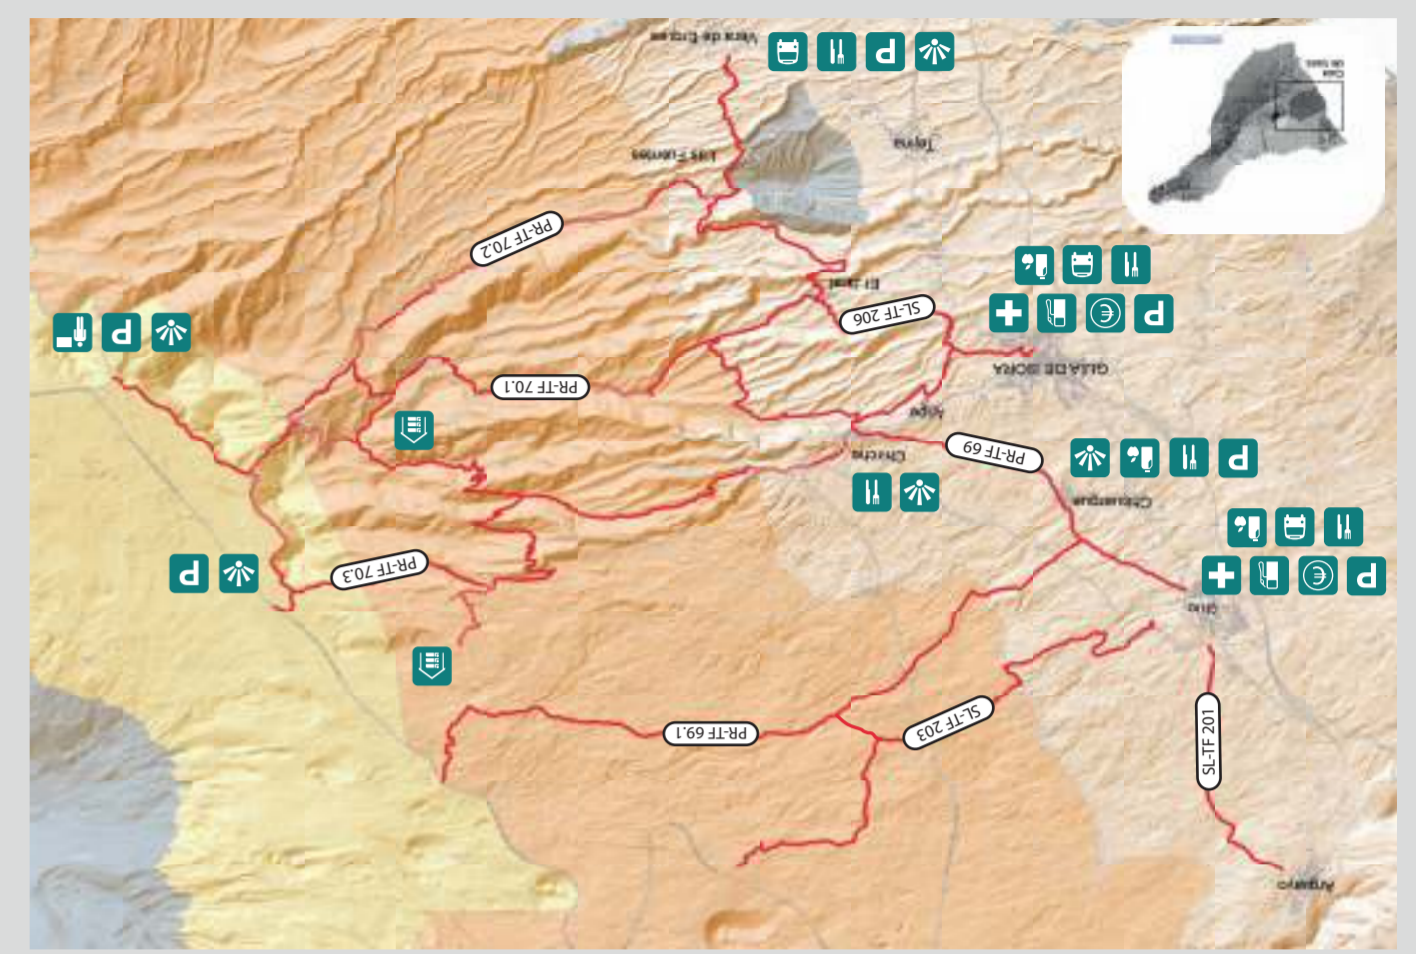

This path can be followed in both directions: leaving from the Chasogo track, or from the district of Chiguergue. where our route ends at kilometre 6,2 of the TF-38 road. built on pahoehoe morphology: the era of Barquete. The path takes us to the Chasogo track, which we will follow until the end, where our route ends at kilometre 6,2 of the TF-38 road.

We begin the route in the hamlet of Chiguergue, at the cross-roads with PRTF 69 Chío - Vera de Erques. We follow the paved path up to the TF-38 road, which we will cross to enter a more recently in disuse. Later, we will come across the connection with the SL-TF 203 Chío - Los Arenales path. We will continue up the path to the Natero de Sánchez, a plain where rye used to be grown. The path passes by the Caledón del Escobón, a walled space formerly used to keep livestock. We leave the pine forest behind us to enter a zone of volcanic badlands where we will see interesting volcanic morphologies such as pahoehoe lava sheets, ropy lava and lava tubes. This area, known as Raven-ton de Pedro Hernández, also contains a former threshing floor.

OUR NETWORK OF PATHS

PR-TF 70.3 Boca Tauce - Refugio de Chasogo
The landscape along this path is mainly volcanic badlands and interesting volcanic morphologies. You will observe former threshing floors (eras) built on pahoehoe lava, known as the Era de la Fajana de Charagueche and the Era de los Guanches.

- Look after your safety**
 - Wear suitable walking boots or shoes for the difficulty of the route.
 - Do not forget to carry a raincoat and a hat to protect yourself from the sun.
 - Make sure you have enough water and food for the duration of the walk.
 - Remember that there is not always mobile phone coverage in natural areas, but it is advisable to carry a mobile phone. Check that it is fully charged before leaving.
 - Risks increase if it rains or there are strong winds. Stay informed of the weather forecast.

- Preserve the environment**
 - Keep the path clean and take your rubbish with you.
 - Take great caution with cigarette butts. They can cause fires.
 - Bear in mind that we are in fragile natural areas. Do not pick or take plants or any other elements.
 - Avoid creating noise. Respect the environment.
 - To preserve the landscape, do not leave the marked paths.

- Plan your route**
 - Avail of the help of guides, maps and people with adequate walking experience (for example, from walking clubs and associations, tourist information offices and accommodation providers).
 - Obtain information about distances, difficulty level and the estimated time needed to complete the route, as well as any possible risks that could occur.
 - Gauge your physical ability to complete the route according to its technical characteristics: accumulated ascent and descent, duration...
 - Consult the weather forecast.
 - Tell your friends or relatives about the route you plan on doing and where it is.
 - If you are walking with children or larger groups remember that you will need a lot more time.

EMERGENCIAS | EMERGENCY 112

Pino de la Leche

Legend says goatherds of the area used to rest in the shade of this huge pine tree and milk their animals.

Llano de Sánchez

An extensive plain where rye used to be planted and grown.

Caletón del Escobón

A space formed by lava between two walls, that was formerly used to keep livestock and to shelter from the cold.

Ropy lava

In these lava flows the way the lava moves results in long and narrow twisted and plaited tubes of lava which take on the appearance of a rope or cable.

Chiguergue

Pahoehoe lava sheets

Pahoehoe lava flows have a soft and glassy appearance with very characteristic ropey structures. They form in the eruption of magmas that are not very viscous.

Lava tubes

Lava tubes or volcanic tubes are volcanic caves, usually tunnel-shaped, which form inside lava flows of different consistencies.

Era de Barqueto

Circular area, dug into the rock, or built on flattened earth, used to winnow and thresh cereals. It has a wind-breaking wall, perimeter stones, paving and a central stone, also called the threshing stone. The Era de Barqueto is beside lava tubes and built on pahoehoe volcanic soil.
