Guía de Isora Path Network

PR-TF 69 Chío-Vera de Erques
Along this path we can observe numerous plots devoted to traditional agriculture, such as vineyards and some isolated houses. A visit to the rural settlement of Chirche is a must as it has been declared a Site of Cultural Interest, as well as the hamlet of Las Fuentes.

SL 201 Chío-Arguayo
Along this path we will see traditional agricultural plots with low dry stone walls, and we will enjoy panoramic views of the western side of the town. In this area of volcanic badlands, the main vegetation consists of aeoniums and isolated pine trees.

PR-TF 69.1 Chiguergue-Chasogo
Most notable along this route is the impressive area of ropy lava, pahoehoe flows and lava tubes. This path leads to the recreational area of Los Arenales (recreational area in Chío).

SL 203 Chío-Arenales
The route begins by crossing a pine forest growing on recent basaltic lava flows and passes through a very homogeneous area with small lapilli fields and volcanic badlands. There is a recreational area here and a zone for camping.

PR TF 70.1 Boca Tauce - El Jaral
This route offers spectacular panoramic views of the town, and especially of the Barranco de Tágara ravine. There are different ethnographic elements along the path.

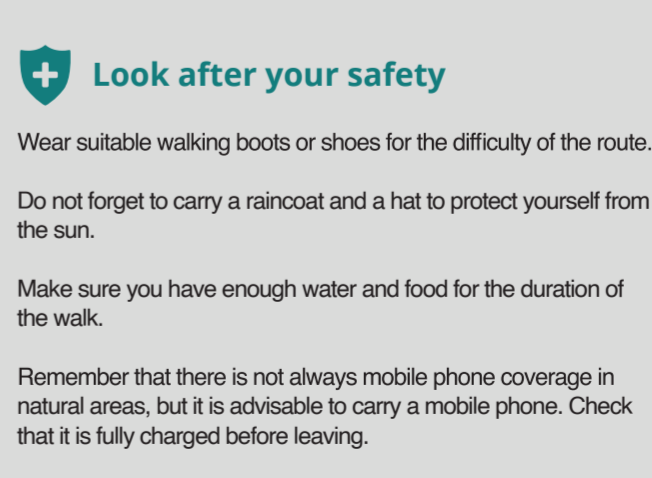

SL 206 El Jaral-Guía de Isora
The Barranco de Rodrigo ravine and the Cruces de Ramallo are some of the places of interest that you will find along this path covered in rock roses, shrubs with striking white flowers traditionally used to smoke cheeses.

This section of the PR-TF 70 starts at the car park of the Juan Évora Ethnographic Museum, in Boca Tauce. However, it can also be accessed from the Narices del Teide viewpoint. This trail leads to the Chasogo mountain shelter and the first section coincides with path number 18 of the Teide National Park path network. At the start we will pass through a sector of volcanic badlands where we can observe interesting volcanic morphologies. All along the path, embedded in the edges of eroded volcanic flows, we will see beehives in disuse and an interesting former threshing floor built on pahoehoe lava, known as the Era de la Fajana de Charagueche. We will continue walking down as we enter a pine forest through a narrower stretch of path called Paso de Charagueche. We will continue walking down a hill, where the main vegetation is Canaries pine, until we reach an opening beside a ravine called Era de Cho Juan de

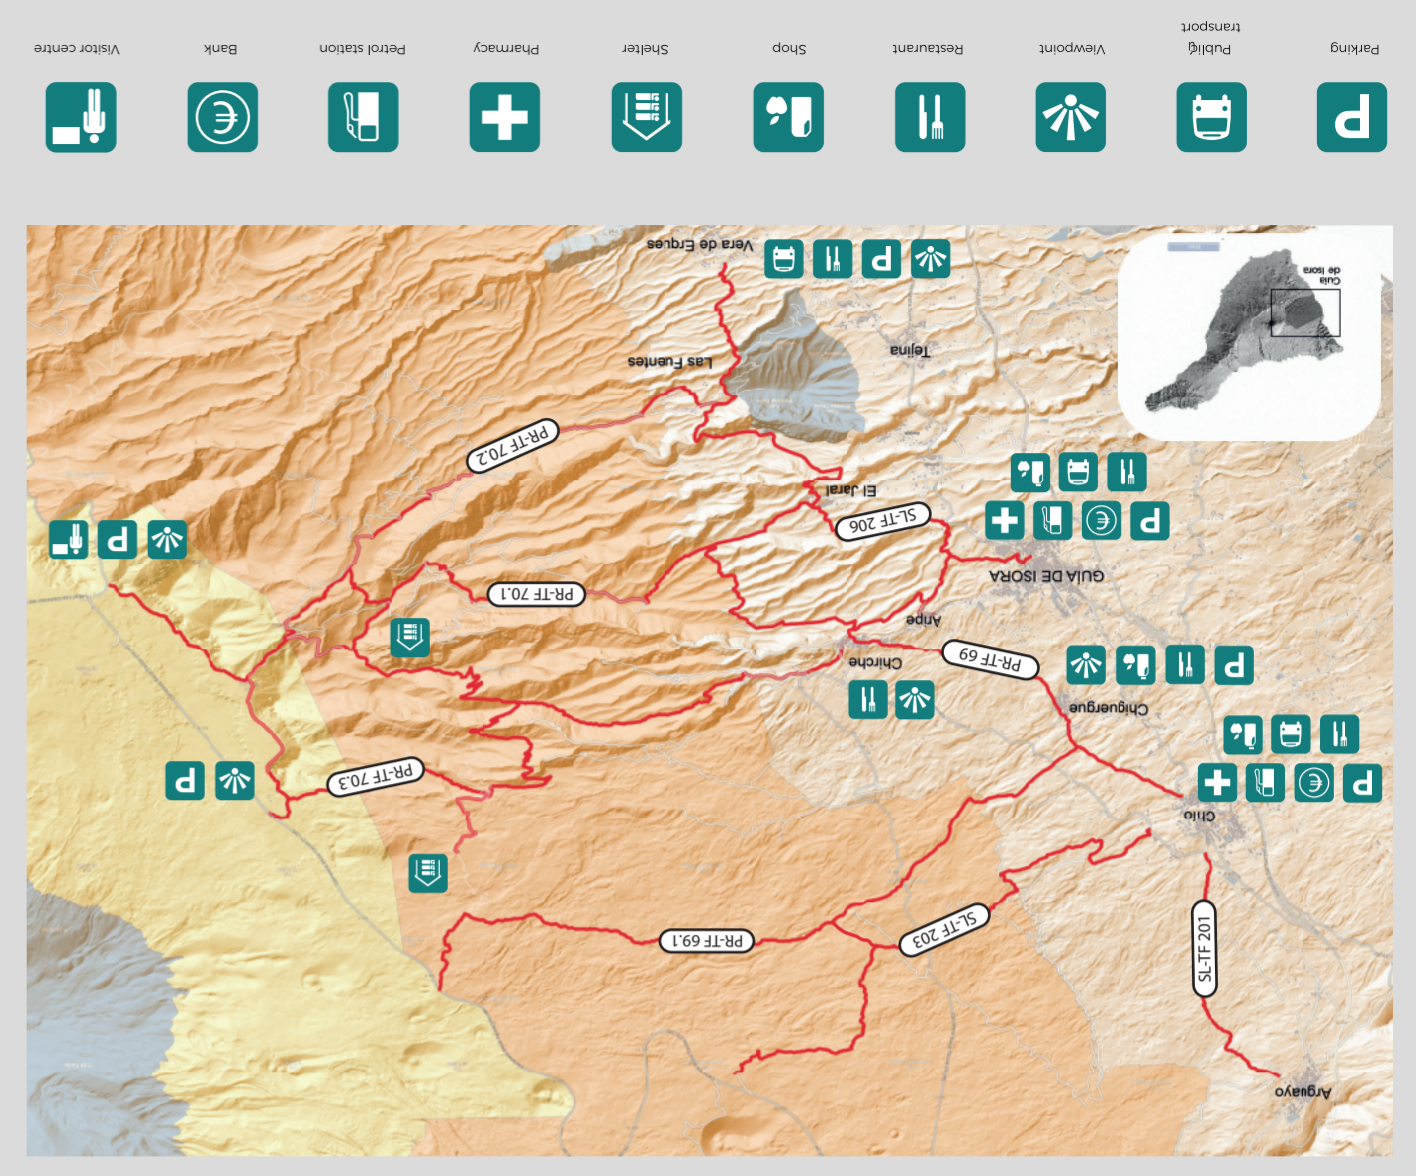

OUR PATH NETWORK

PR-TF 70.2 Boca Tauce - Las Fuentes
This route provides impressive panoramic views of the mountains of Isora, and even out as far as the islands of La Gomera, La Palma and El Hierro. We will find endemic species such as tagasaste and sticky broom (codesos), and we will visit the hamlet of Las Fuentes.

SL 206 El Jaral-Guía de Isora
The Barranco de Rodrigo ravine and the Cruces de Ramallo are some of the places of interest that you will find along this path covered in rock roses, shrubs with striking white flowers traditionally used to smoke cheeses.

Preserve the environment

- Keep the path clean and take your rubbish with you.
- Take great caution with cigarette butts. They can cause fires.
- Bear in mind that we are in fragile natural areas. Do not pick or take plants or any other elements.
- Avoid creating noise. Respect the environment.
- To preserve the landscape, do not leave the marked paths.

Plan your route

- Avail of the help of guides, maps and people with adequate walking experience (for example, from walking clubs and associations, tourist information offices and accommodation providers).
- Obtain information about distances, difficulty level and the estimated time needed to complete the route, as well as any possible risks that could occur.
- Gauge your physical ability to complete the route according to its technical characteristics: accumulated ascent and descent, duration...
- Consult the weather forecast.
- Tell your friends or relatives about the route you plan on doing and where it is.
- If you are walking with children or larger groups remember that you will need a lot more time.

Look after your safety

- Wear suitable walking boots or shoes for the difficulty of the route.
- Do not forget to carry a raincoat and a hat to protect yourself from the sun.
- Make sure you have enough water and food for the duration of the walk.
- Remember that there is not always mobile phone coverage in natural areas, but it is advisable to carry a mobile phone. Check that it is fully charged before leaving.
- Risks increase if it rains or there are strong winds. Stay informed of the weather forecast.

Guía de Isora

Las Fuentes

Pahoehoe lava

Pahoehoe (from the Hawaiian word pāhoehoe, which means "smooth") or ropy lava is generally from basaltic lavas. These flows have a bumpy texture which looks like rope, and gives them the name ropy lava; they are internationally known by their name in Hawaiian, pahoehoe.

Panoramic views

This path boasts stunning panoramic views of the Isora Mountains and the islands of La Gomera, La Palma and El Hierro.

Era de la Fajana de Charagueche

An era is a circular area, dug into the rock, or built on flattened earth, used to winnow and thresh cereals. It has a wind-breaking wall, perimeter stones, paving and a central stone, also called the threshing stone. Considering the importance of the wind, they were located in airy zones on hills or headlands. In this case, they bear their traditional names. It is believed that the Era de los Guanches dates back to the pre-Hispanic era, and was used by Guanche ancestors, hence its name.
